Civil Engineering is a broad spectrum program. You will study elements of structural, transportation, mining, geotechnical, water and waste engineering. If you have good math skills, a logical mind and the desire to build upon the world around you, then Civil Engineering Technician program will give you the tools you need to succeed.

Our small class sizes mean you will get great practical hands-on experience with the latest industry-standard technologies, including Computer-Aided-Drafting (CAD), Project Scheduling Software and Surveying. You'll also gain knowledge in the design, construction and operation of water, soil, geomatics, roads, railways, bridges and buildings. In the second year, with a mandatory work experience component, you will get experience working directly with industry; many students secure continued employment at their placement organizations upon graduation.

Upon graduation, job vacancies are available in the Thunder Bay area and across Canada. Graduates can find employment in project planning and design, mining, highways and transportation, concrete and other construction materials, construction inspection and contract administration.

Credential Upon Completion	Ontario College Diploma
Annual Fees (CAD)	\$18,067 + \$1,000 program costs (2024-25)
English Proficiency	IELTS 6.5, no band lower than 6.0
Eligible Applicants	High School Diploma + Grade 12 Math (GPA 60%)
Intake	September
