\$38.00

(Canada Job Bank, Nov 2023)

In this program, students learn about electronics and computer fundamentals, telecommunications, networks, automation control systems and computer software. Our new high-tech lab allows students to enhance their learning experience while providing an unparalleled look into the world of electronics design and verification.

The Electronics Engineering Technician – Computers program provides a solid foundation in electronics and computer fundamentals. Our new electronics lab (completed 2021) boasts state-of-the-art equipment providing the capability to analyze and measure a myriad of analog and digital signals. Each individual station is equipped with the latest network connected meters, counters, timers, oscilloscopes, signal generators and power supplies to create an exceptional learning environment for students preparing to enter the electronics job market.

Graduates are in high demand and job vacancies are available in the Thunder Bay area and across Canada. Graduates can find employment in a range of positions that include network installation and repair and maintenance of electronics equipment. Positions can be found in computer networking, industrial systems, heating and cooling systems, telecommunications, security systems within financial services, health care, manufacturing and database/information systems.
