

Information Communication Technology (ICT) Solutions for Business

This post-graduate program is unique in Ontario, defined by its focus on meeting the ICT requirements of business. Students develop and learn how to apply technical skills, business skills and interpersonal skills in a wide variety of business settings.

The ICT Solutions for Business program enables students to become proficient in the practices and techniques used in modern ICT infrastructures. Students learn how to develop and implement practical solutions to solve the typical ICT problems and challenges faced by a wide range of companies and businesses. Instructional methodology integrates theory with real-life simulations and hands-on, practical applications. Students apply their acquired knowledge and skills to industry-based cases, working on both individual and several collaborative team projects. Students also have the option to take the exam for the Cisco Certified Network Associate (CCNA) certification.

Upon graduation, job vacancies are available in the Thunder Bay area and across Canada. Graduates can find employment in a range of positions that include computer network technician, web technician, software engineers, database analysts and data administrators, system testing technicians and more.
